## California Journal of Mines and Geology Volume 8

By California State Mining Bureau

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 edition. Excerpt: . at one time to be worked by a new shaft, down stream from the main shaft, but so much water was encountered, that the dram tunnel became a necessity and now serves to drain the whole mine. The object in working from a shaft is to obtain grade for washing and storage for tailings, the latter a point of great importance. The mine is ventilated by a Baker blower, driven by a Pelton water wheel; there being also an engine, which may be used for the purpose. The air pipe reaches the main shaft at a depth of sixty feet through a tunnel. The design in this arrangement is to insure a continual air supply to the mine in case of the burning of the hoisting works; also, in such event, to afford means of escape for the miners--an example which should be followed in...
