But its interior remained a blank until the middle of the present Century; it has now been traversed in various directions both north and south of the equator, immense lakes and mountains have been discovered, great rivers have been traced to their sources, and the climate of the north and south and the interior has been found to be well suited for the habitation of man. Africa is three times the size of Europe, with a population of nearly two hundred millions, and natural resources equal to those of any other part of the earth. The importance of holding commercial intercourse with its interior has been acknowledged in all ages. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
