OCLC Number: (OCO)243705337 Subject: Groundwater flow -- Computer simulation. Excerpt: . . . 1. INTRODUCTION separate gas phases. Any of the reactions The fate and transport of chemicals such as can be specified as either rate or equilibrium radionuclides in groundwater aquifers is controlled. The reaction rates can be affected by both the flow of ground water represented by a wide array of reaction rate and by geochemical reactions. Computer laws including variable order kinetics, mass models are often used to simulate the action or Transition State Theory kinetics, reactive transport of radionuclides in Monod kinetics, and user defined rate laws. groundwater in order to predict future Thus, RATEQ replaces the simple reaction concentrations and subsequently the dose. package available in MT3DMS with a fairly These computer models therefore must general geochemical reactions package.
